

We are looking for a

Solution Engineer Intern (6m FTC)

BOXARR is looking for a Solution Engineer Intern to support pre-sales and post-sales activities with our exciting global base of customers. Working with BOXARR Solution Engineers and account managers, you will be helping to deliver technical training, consultancy and demos to new and existing customers. You will become an expert user and advocate of BOXARR, developing your own BOXARR models to help address complex technical and business challenges. You will be part of a strong and supportive team, and will have the opportunity to develop your customer-facing skills along with your technical, creative and problem solving skills. BOXARR is growing apace, we are always looking for new talents, and this 6 months internship with us could lead to a permanent position.

Who are we?

At BOXARR, our goal is to nurture a work environment that inspires collaboration, fun and productivity. This is an exciting opportunity for you to grow professionally while building real prospects for your future career alongside a fantastic team. A career at BOXARR can be many things, but most of all it should be fun and rewarding. At BOXARR you'll get the flexibility and support you need to make a difference, to contribute, and to succeed.

You will:

- Learn how to use BOXARR, an innovative software solution for managing complex industrial problems, in use at many blue chip companies.
- Work with Solution Engineers, to help perform BOXARR Demos, set up Proof of Concepts, set up new BOXARR installations, and model business problems in order to create valuable solutions for customers.
- Assist with authoring and refreshing documentation, testing new features, and performing other tasks that are core to our software business.

You will be involved in helping BOXARR grow and scale as a company. So a flexible and can-do attitude is a real bonus. For the successful candidate, BOXARR offers fantastic opportunities for both personal and professional development.

Key Requirements:

- Excellent written and verbal presentation skills.
- An analytical mindset, with good interpersonal skills.
- Experience in using common analysis software such as Excel.
- Ability to provide IT support to customers when required (i.e. installation and configuration of the solution).
- Familiarity with the basics of computer architecture, scripting, databases, etc.

A healthy work-life balance is very important to us and we offer a fun and enjoyable environment with flexible working hours.

We believe that it is not possible to put every type of diversity into words. We always have and always will live with the intention that every person, from every background and demographic, is welcome. Whoever you are, and wherever you come from, we believe you have something to add to our mission. If this sounds like the place you have been looking for, apply today. We look forward to hearing from you.
